SUMMARY

Computer Information Systems and Cybersecurity graduate with hands-on experience building full-stack web applications, cybersecurity simulations, and business software. Thirteen years of operations management experience combined with strong software development skills in Python, C++, JavaScript, SQL, and Linux. Passionate about solving real-world problems through technology and rapid prototyping, and excited to apply my skills across software development, IT, cybersecurity, and emerging technologies.

TECHNICAL SKILLS

Languages:

Python, C++, C, SQL, HTML, JavaScript, Bash, Assembly

Frameworks & Tools:

Flask, SQLite, Docker, Github, VirtualBox, VS Code

Operating Systems:

Linux (Distros: Tails, Void, Arch, Ubuntu, Kali, Mint, Gnome, Puppy), Microsoft Windows

Cybersecurity:

Autopsy, FTK Imager, Cisco Packet Tracer, Ghidra, Wireshark, Metasploit

Other:

Godot, Gimp, Audacity, Smart Draw, Service Autopilot, LMN Solutions, Company Cam, Flask, Discord, Zoom, Microsoft Suite, Teams, Claude, Gemini, Chat GPT

APPLICABLE SOFT SKILLS

Operations Management · Client Relationship Management · Team Leadership

Resource Allocation and Planning · Interpersonal Communication · Deadline Management

Business Advertising Management · Employee Training and Development · Project Creation and Execution

EDUCATION:

Concord University, Athens WV

BS in Computer Information Systems May 2026

BS in Cybersecurity May 2026

Minor in Math May 2026

Dean's List Recipient Spring 2024 · Fall 2024 · Spring 2025 · Fall 2025 · Spring 2026

PROJECT PORTFOLIO

RiskVector.org - Cyber Attack Simulation Platform

A Monte Carlo-based cybersecurity simulation platform that uses real-world breach data to model attack paths, estimate financial impact, evaluate defensive effectiveness, and generate preparedness and risk scores for organizations.

VoidScroll.org - Zero-Back-end Infinite Video Platform

a fully client-side progressive web app (PWA) that delivers 24,000+ public domain videos across 17 categories using vanilla JavaScript, Service Workers, and a Python scraping pipeline, featuring infinite scrolling, gesture-based mobile navigation, and ambient sound mixing.

Portal-Music.com - Copyright-Free Music Platform

a copyright-free music platform that provides royalty-free tracks for YouTube and TikTok creators, helping reduce copyright claim risks while offering guidance for resolving content claims through an accessible, user-focused design.

Hack Attack - Game-Based Cybersecurity Learning Tool

Led a development team as Project Manager to create Hack Attack, an interactive cybersecurity training game built with Godot, coordinating collaboration through GitHub while teaching foundational cybersecurity concepts through engaging game-play.

Riverside Lawncare Inc. - Co-Founder & Operator - RiversideLawncareBeckley.com

Co-founded and grew Riverside Lawncare Inc. into a successful business operating since 2013, overseeing daily and long term operations, customer acquisition, digital marketing, and the development and maintenance of the company's website and online presence.

Other Projects

Additional projects include Movie Monster, a movie database application built with Google AppSheet; Pawster, an animal foster coordination prototype developed with Python, Flask, and SQLite; and AI music experimentation involving prompt engineering, AI-assisted music production, and digital distribution across streaming platforms.

PROFESSIONAL EXPERIENCE

Riverside Lawn Care: *Operations Manager - 2013 to Present*

Manage operations, staffing, customer relations, and resource planning for a lawn care business serving 100+ clients

Bridgeport Equipment and Tools: *Service Manager - 2022 to 2023*

Led a team of mechanics while managing customer service, estimates, billing, and service operations to deliver efficient, high-quality equipment repairs.

Winterplace Ski Resort: *Ski Tech - 2013, 2016, and 2017 (part time)*
